

Page 1) Dimensions of pickup

Page 2) Dimensions of cavity or cut-out.

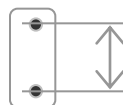

**Mounting Foot shape:**

Some guitars where the pickups are mounted to the floor of the pickup cavity (such as Ibanez for example) require a different foot shape. Like this > (and shown above)

We will modify the foot shape and drill the hole to suit the mounting (to wood) screws upon request in the Additional Notes box of your order.

We also supply our humbuckers for 3 screw mounting with a 2 screw mounting foot on one side.

Specify distance between these 2 screws

You specify the distance between the 2 screws in the ORDER CHANNEL.

Details of cavity / cut-out. The two shapes shown are the most commonly used by guitar manufacturers.
